

Spring SAC Star Party on Friday, 10-Apr-2026

Salina Astronomy Club (SAC) will host a FREE observing session at The Land Institute (TLI), which is less than 6 miles (or 12 minutes) away from KWU. We will be safely observing the Sun, its sunspots and prominences; from 6 PM to 7:30 PM. After sunset at 8 PM, we will look for our sister planet, Venus; the gas giant, Jupiter; the distant ice giant, Uranus and after 9PM Deep Sky Objects, the “Fuzzies”. Of course, if observing conditions are unfavorable, then observing session at TLI will be canceled. Check the SAC website the afternoon of the Star Party for weather updates. **ALL are welcome. Come and go as you wish to our FREE program.**

See map below, showing travel route as follows: East on Cloud to Ohio. Turn right on Ohio and travel to Water Well. Turn left on Water Well, then travel to TLI, 2440 Water Well Rd.
